- **Tools:** Figma, Git, GitHub, Docker, Linux
- **Other Technologies:** PrimeNG, RxJS, Axios, Validation, FormKit, Vite

ABOUT ME

I am a highly motivated IT student from Hungary, now my studies ends as a software development technician. I definitely continue my studies in this way at university. The field, where I'm the most comfortable is web development using a framework, like Vue or Angular with Typescript, and I am always striving to keep my knowledge up to date.

REFERENCE AND EXPREIENCE

Task Evaulator & Chrome Extension

Project

- Real users
- Full stack project with containerization.
- Developed frontend using Angular, Vue and Laravel
- Designed interface based on Figma designs using TailwindCSS and smooth animations
- Responsive for all type of devices
- Feature branches, pull requests and issues

Support Associate

Position

- It was really useful for me to improve my conversational and multitasking skills
- Experience with office life and rules
- Work with sensitive datas (GDPR)
- Meet with Slack and using tickets

LANGUAGE

Hungarian (native)

English (conversational)
